

Acne

Brufoli Control

For The Treatment of Acne

Brufoli Control

Description

Recommended for acne-prone skin. The formulation is based on active ingredients with sebum-normalizing, antimicrobial, moisturizing and

elasticizing action. The skin feels immediately softer and more elastic after applying, and the size of the pores are noticeably diminished. Formula free from

parabens, animal proteins, silicones.

Role of Brufoli Control in Acne

Isodecylsalicylate With Isopropylbenzylsalicylate

It's an apha-hydroxyacid conjugate from natural ingredients (Salix alba and Cuminum Cyminum L.). It enhances the cutaneous activity, it keeps under

control the inflammatory processes; it's important in anti lipid peroxidation and in the process of keratinisation, where it enhances the activity of

filaggrin.

Polyporus Officinalis Extract

This extract derived from Polyporus officinalis, a fungus that grows in Russia and in the Balkans, which has the capacity to improve the aesthetic

appearance of the skin due to its toning and astringent properties. The skin will be immediately softer and more elastic

after application and the pores will be greatly reduced in size. Moisturizing properties are also demonstrated.

Arctium Lappa Extract

The extract has a purifying and astringent action. The burdock is specific in the treatment of impure

skin.

Alfa-Bisabolol

It's an active ingredient from the essential oil of Chamomile, with strong soothing, anti-

inflammatory and anti-reddening properties.

Copper Usnate

Copper Usnate is the copper salt of usnic acid. It has been used as an antimicrobial.

Vitamin E, C

They have moisturizing and anti-free radical properties, carry out an anti-inflammatory

action, reduce lipid peroxidation and defend the skin from ageing.

Directions

Apply Brufoli Control cream in the morning and in the evening on the face, excluding the eyes area.

Features

- Advanced blend of bio-compounds and essential plant extracts terminate oily shine look and help prevent future blackheads and breakouts.
- Fights bacterial activities and repairs inflamed areas to enable skin to recover faster from breakouts, leaving skin flawless with no blemish.
- Creates smooth, clear complexion with invisible pores.
- Brufoli control is the ultimate solution that not only clears the current acne and related problems, but also helps the skin to heal.
